

Salinas Union High School District

Problem of the Week Celebration!

Are you **BORED**? Do you want to have **FUN** and **BE CREATIVE**? Do you like to **EXPLORE**? Are you **CURIOUS** about things? Do you want to **STRETCH** your thinking?

If you answered yes to any of the above questions, then you must be feeling intellectually deprived and you need to stretch your thinking!

So join us for our first ***Problem of the Week Celebration*** where you will be given a problem to solve in one week. This type of problem will require you to take your time in thinking in a variety of ways, to be creative, to use tools or manipulatives and to try different approaches.

- ☒ There will be **three levels**: 7th & 8th, 9th & 10th, and 11th & 12th.
- ☒ There will be **PRIZES** for the best submissions!
- ☒ There will be 2 opportunities to participate and we encourage you to take part in both!

This adventure **begins** Friday, May 1st. It will continue each week. See your grade level **google** classroom below for the instructions that are posted first thing each Friday morning. You may also **SCROLL DOWN** to see the information on this page. The codes are listed below for your reference.

Middle school: juo6fnu, 9th & 10th: yzxsudz, 11th & 12th grade: 3aknmqr

Problem of the Week

Due May 8: - "Visualizing Pennies"
